# Abstract

Innovation in technology has been a tremendous breakthrough in the past decades. Especially with the development of smartphones, which has contributed to the thriving evolution of websites and online applications. Online payments have become popular and widely applied, but still encountered inadequacies between different currencies used by each country. The currency has been gradually asserting its position when enormous enterprises as Microstrategy, Tesla, Galaxy Digital, etc. in turn invested in and legalized the products purchasing by cryptocurrency.

What do you think about the idea of using cryptocurrency online payments on all eCommerce platforms, online betting, and gambling applications? What do you think about the online real estate investment idea, where we can buy, sell and receive profits with virtual currencies? Asia in general and China, Japan, Korea, Thailand, Vietnam, Cambodia, in particular, is a massive market facing many dilemmas caused by the above intricacies. Therefore, CorgiDoge was created to enforce the above ideas. We are building not just a crypto coin but a community, an ecosystem to develop online payment and real estate investment to the next level.

CorgiDoge wants to build an empire where we can resolve all the blemishes in online payments in inadequate countries like Japan; strict regulations in gambling, online betting in Asian countries. We are also building a real estate investment ecosystem - a property consulting channel that still operates mainly by offline direct merchandising.

In some countries like Japan, eCommerce platforms are greatly grown, nevertheless, the drawbacks of payment obstacles have not been solved yet. Typically as when paying for international stall owners, only direct payment is applicationlicable. This creates many complexities for foreigners who want to sell products on Japanese eCommerce sites. CorgiDoge has been developing to be a partner with Japanese eCommerce platforms and become the payment currency for stall owners.

In Asian countries, online gambling and betting are currently illegal, but it is still possible to believe in changing regulations in the future. CorgiDoge will replace the current currencies to become the authorized currency used in online gambling and betting applications. Users will no longer have to go through many conversion procedures and can directly transfer/withdraw CorgiDoge from their wallet to the in-application wallet and vice versa.

In terms of the real estate field, CorgiDoge will be an alternative to the current currency for real estate payment. The CorgiDoge team will develop an application on which investors can use CorgiDoge to buy real estate. You will not need to spend a large amount of cash to invest in real estate, our application will divide the real estate into small investment packages, you just need to participate in the investment by buying a part of real estate products through these packages. Investors will enjoy double profits from the increase in the price of real estate and CorgiDoge.

## ABOUT MASTERCHEF

---

## VISION, MISSION & STRATEGY

---

Our vision is to build an ecological system around CorgiDoge including spaces, working communities, real estate investment applications, eCommerce platforms, cryptocurrency exchanges that are suitable for everyone. This system will encourage the acceptance and utilization of CORGI cryptocurrency to help promote demand and create value for sustainable development in the future.

Our mission is to maintain and expand a sustainable business model with the orientation of connecting businesses directly with customers, maximizing the visualization of the CORGI cryptocurrency. By the strategy of creating a real estate investment application and eCommerce platform, the cryptocurrency exchange, we present sincere concern about sustainable core values.

Real estate investment application, eCommerce platform, the cryptocurrency exchange is designed to maximize the benefits of CORGI coin. The long-term development-oriented CORGI will become one of the used coins widely and replace existing coins.

The CorgiR real estate investment application is designed for global real estate investing starting from small investment packages. Property owners will be authorized to use the application to market their properties/products for free, in exchange for a discount to CORGI cryptocurrency holders. In this way, the marketing cost saved from the ongoing asset owner will be transferred directly to the owner in cryptocurrency (CORGI) at a lower price. Furthermore, as stated, although anyone can participate in the community through the application, only CORGI cryptocurrency holders can invest at attractive discounts. Investors can legally buy potential real estate in any country in the world thanks to the CORGI application and currency. Currently, no real estate investment application can perform multinational quickly.

CorgiE eCommerce platform is designed for trading and shopping in countries with payment obstacles such as Japan. CORGI will be used as the main payment currency on this eCommerce platform. We will allow the purchase of goods on the eCommerce platform using CORGI coin. In addition, sellers from all countries other than Japan will be able to effortlessly pay via CORGI instead of facing barriers the same as the present. The merchants now only have to sell products and earn revenue in CORGI at the end of the month, then exchange CORGI for money when the market price is high. Trading CORGI and collecting money is much easier with our cryptocurrency exchange. In addition, CORGI will be popularized on existing cryptocurrency exchanges. Besides, sellers have a way to make more profits by hoarding CORGI currency and selling at high prices.

The CorgiS cryptocurrency exchange is designed for the investment community around the world to trade and store cryptocurrencies. Transaction and maintenance fees will be charged in CORGI currency, thus contributing to the tremendous growth in value of CORGI. We are creating a system that can be the No. 1 cryptocurrency exchange of the world.

## Payment methods

CORGI holders can use it to pay on CorgiE marketplace, CorgiR investment application, CorgiS exchange, and online applications, eCommerce platforms, exchanges that accept CORGI.

## Investment method

CORGI owners, in addition to investing in the CorgiR application, can also hoard and profit from holding CORGI currency. We are having transcendent policies for paying monthly profits along with the growing value of CORGI (minimum 4%/month)

## THE IDEA OF MASTERCHEF

---

MasterChef is rooted in the limitations of current real estate and eCommerce.

This concept has spurred development into an idea of creating an ecosystem to solve, driving the growth of the 5.0 era. The era when cryptocurrencies will gradually replace existing currencies and be widely used in life by the world.

The concept of this entire ecosystem has been developed to perfect the original concept by creating a cryptocurrency using the Binance Smart Chain Blockchain.

# THE ECOSYSTEM

Our ecosystem consists of 4 core components: cryptocurrency, cryptocurrency exchange, real estate investment application, eCommerce platform, that built to create value for CORGI crypto-currency investors and holders.

- CORGI cryptocurrency

CORGI currency uses blockchain to transfer the value and benefits of crypto-currency holders.

- CorgiS - cryptocurrency exchange

CorgiS cryptocurrency exchange allows trading and storing cryptocurrencies. In addition, it also pays profits to investors holding CORGI cryptocurrency.

- CorgiR - real estate investment application

CorgiR Real Estate Investment application allows people to invest in real estate worldwide by paying with CORGI cryptocurrency. In addition to profiting from real estate, investors also benefit from the growth price of CORGI in the cryptocurrency market.

- E-commerce platform CorgiE

CorgiE eCommerce platform allows anyone to buy/sell decentralized goods and pay with CORGI cryptocurrency, address the current inadequacies of currency exchange rate differences between countries.

The development of the CORGI ecosystem will be produced by raising capital through the utility cryptocurrency on Binance Smart Chain. Profits and offers on the CORGI ecosystem will be exclusive to crypto coin holders. Cryptocurrency holders have the option to use their cryptocurrency within the CORGI ecosystem.

# CORGI CRYPTO COIN SELLING - ROAD MAPS

---

The total volume of CORGI that will be released to the market is 1,000 Trillion

Of that, only a maximum of 10% is put into use, ie 100 Trillion distributed in 5 main stages.

900 Trillion will be generated by the community itself by mining from phase 6.

The number of CORGIs you want to increase can only be achieved through the use of mining pools (CORGI pools)

10 Trillion (10%) – Launch of Corgidoge on Binance Smart Chain & Airdrop, swap reward on PanCakeSwap & BakerySwap

- ✓ Advisors, partners, team, company reserves 3%
- ✓ Marketing 3%
- ✓ The reward for new member 0.1%
- ✓ Whitepaper
- ✓ IEO sales 3.9%

The first stage is for investors who have been with CORGI since its inception. After the CORGI giveaway for new members (maximum 1 Trillion CORGI), we will officially sell IEO 50% CORGI in the initial issue at a preferential price for investors who wish to be with our team build the CORGI ecosystem.

20 Trillion CORGI (20%) – Launch of official website and mobile wallet. Corgi is be listed crypto exchanges

- ✓ Advisors, partners, team, company reserves 5%
- ✓ Marketing 5%
- ✓ Reward for stake 5%
- ✓ Reward for stake referral 0,1%
- ✓ IEO sales 4,9%

In phase 2, the product will be progressed according to CORGI's development roadmap. CORGI will be listed on cryptocurrency exchanges.

# CORGI CRYPTO COIN SELLING - ROAD MAPS

---

20 Trillion CORGI (20%) – Launching CorgiS, Corgi Wallet 1.0 Release (iOS & Android)

- ✓ Advisors, partners, team, company reserves 5%
- ✓ Marketing 5%
- ✓ Reward for stake 9,5%
- ✓ Reward for stake referral 0,1%
- ✓ Charity 0,4%
- ✓ If there is a large amount of reward remaining, the leftover will be burned.

30 Trillion CORGI (30%) – Launch of CorgiR, Introduction of Corgi Governance Power (GP), Staking, Free Transactions and Mobile Wallet

- ✓ Advisors, partners, team, company reserves 7.5%
- ✓ Reward for stake 14,5%
- ✓ Reward for stake referral 0,1%
- ✓ Charity 0,4%
- ✓ If there is a large amount of reward remaining, the leftover will be burned.

# CORGI CRYPTO COIN SELLING - ROAD MAPS

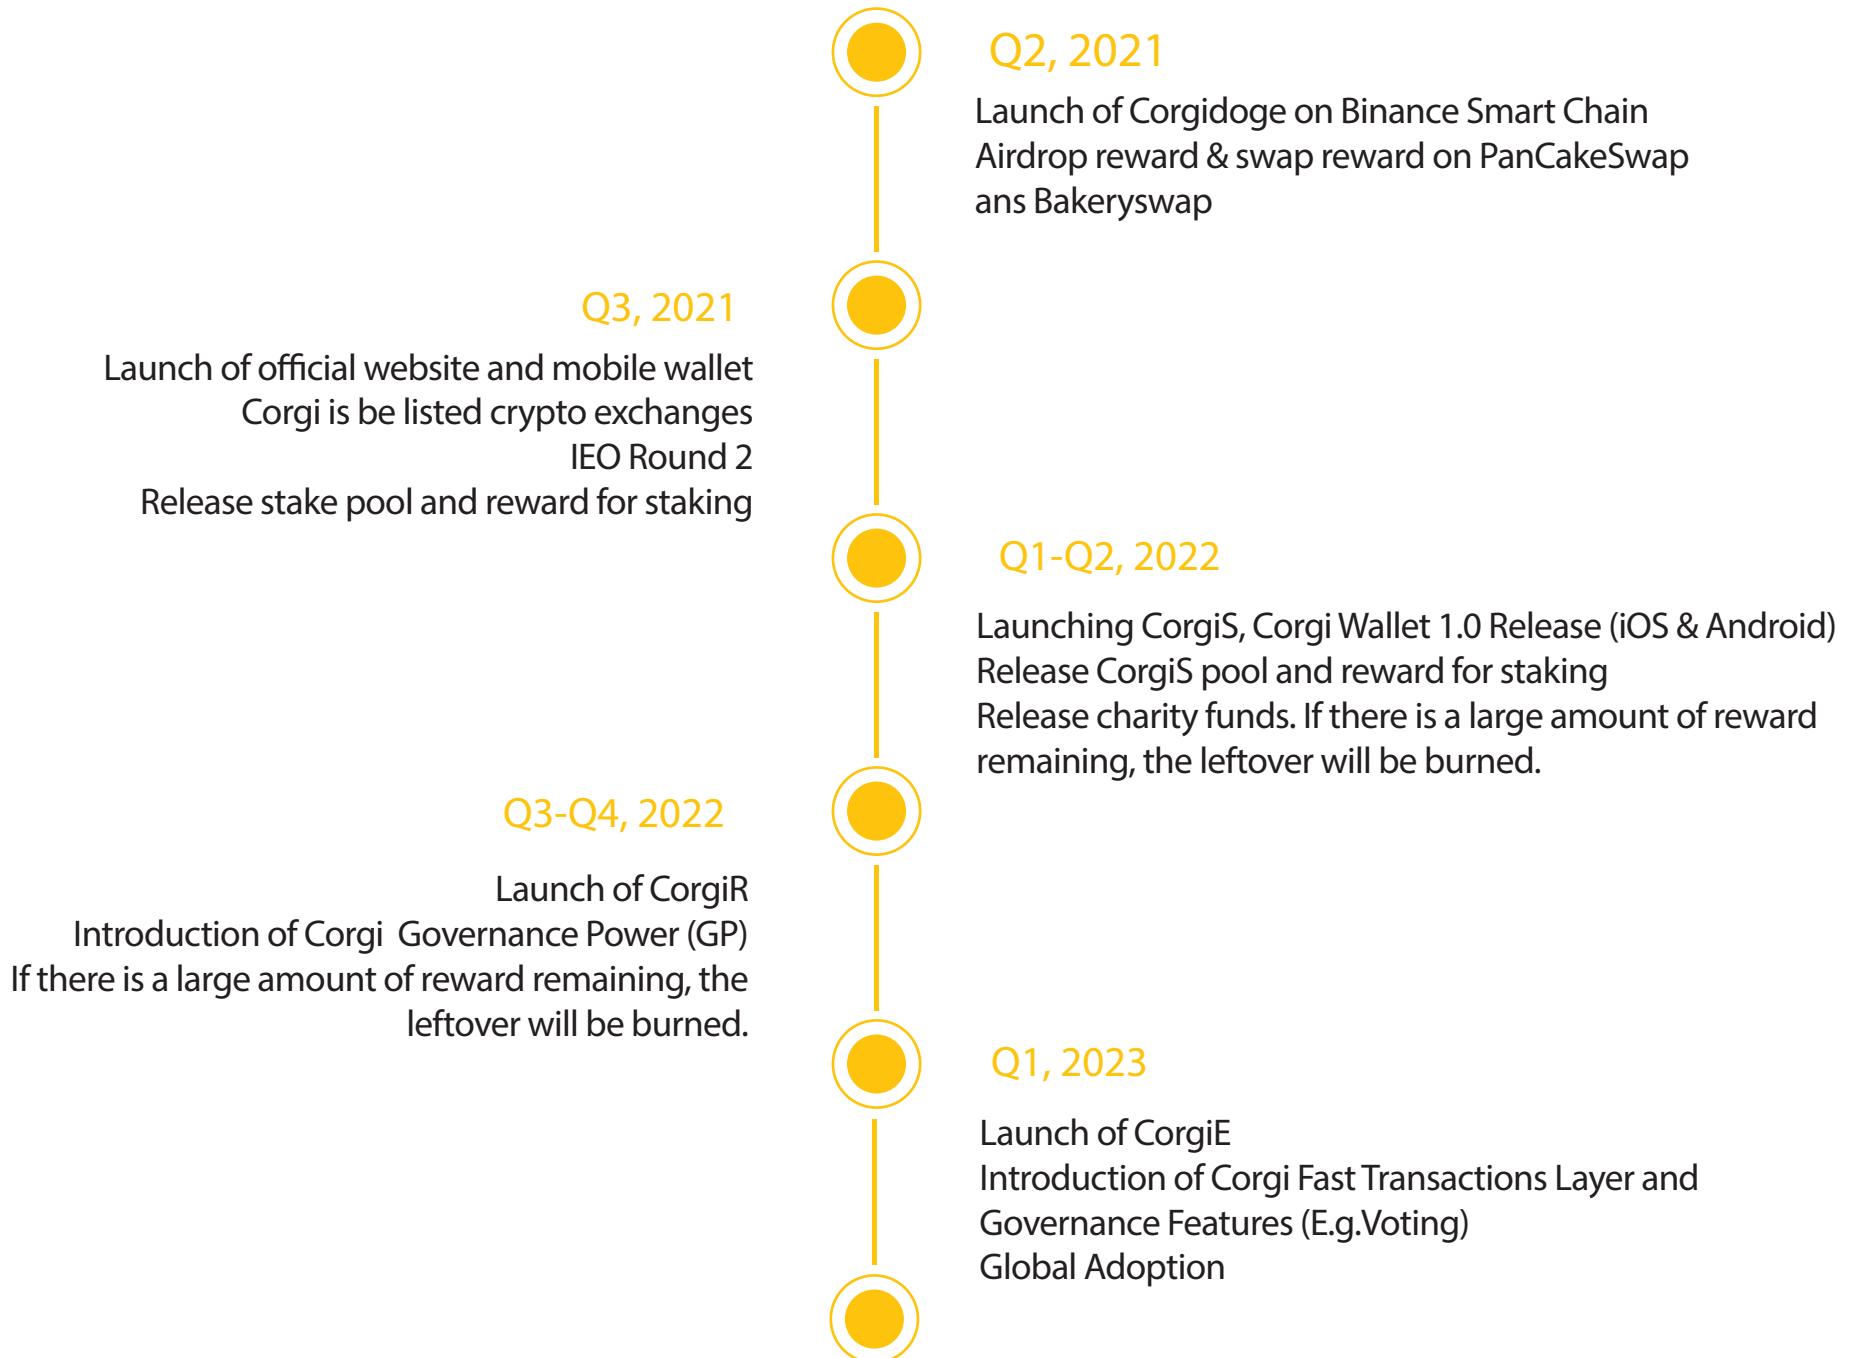

---

20 Trillion CORGI (20%) – Launch of CorgiE; Introduction of Corgi Fast Transactions Layer and Governance Features (E.g.Voting); Global Adoption

- ✓ Advisors, partners, team, company reserves 3%
- ✓ Marketing 3%
- ✓ Reward for stake 6%
- ✓ Reward for stake referral 0,1%
- ✓ Sell for charity 7,9%
- ✓ If there is a large amount of reward remaining, the leftover will be burned.

# CORGI CRYPTO COIN SELLING - ROAD MAPS

---

# ENCODING

---

Purpose: In addition to rewarding ecosystem contributors, the goal of the cryptocurrency in the CORGI system is not only to ensure that those using the platform always feel like they are more than just customers, but also the shareholder that makes CORGIDOGE's success

Not only that, as the ecosystem grows, the CORGI cryptocurrency will encourage believers to continue choosing to participate in the community. This participation will ensure that any services added to our ecosystem receive incentives.

# PARTICIPATION

---

- ✓ Individuals can participate in the CORGI ecosystem by becoming the original owner of the virtual currency through contributions to the IEO
- ✓ Users can obtain CORGI through the purchase of virtual currency on various digital currency exchanges. (available changes may be announced at a later time).
- ✓ Owners who do not have virtual coins can borrow virtual coins from virtual currency owners on a temporary basis to access the CORGI discount

## Why blockchain?

---

Just as the Internet and the World Wide Web have changed the way businesses and consumers communicate with each other, blockchain will change the way businesses and consumers interact and relate to each other. In the days when the success of a product or service was shared only by the business owners themselves, we now have a mechanism that is possible for both the increasingly demanding consumers and businesses selling services, to gain a transparent profit.

Blockchain is a distributed ledger or record (data) of all transactions on a peer-to-peer network. Using this technology, participants can confirm transactions without the need for a central clearing agency. This data is not stored on a centralized server so it is virtually impossible for a hacker to corrupt the information stored in the Blockchain. This data is stored in blocks and then linked to previous blocks in a chain. Hence, it is called the blockchain.

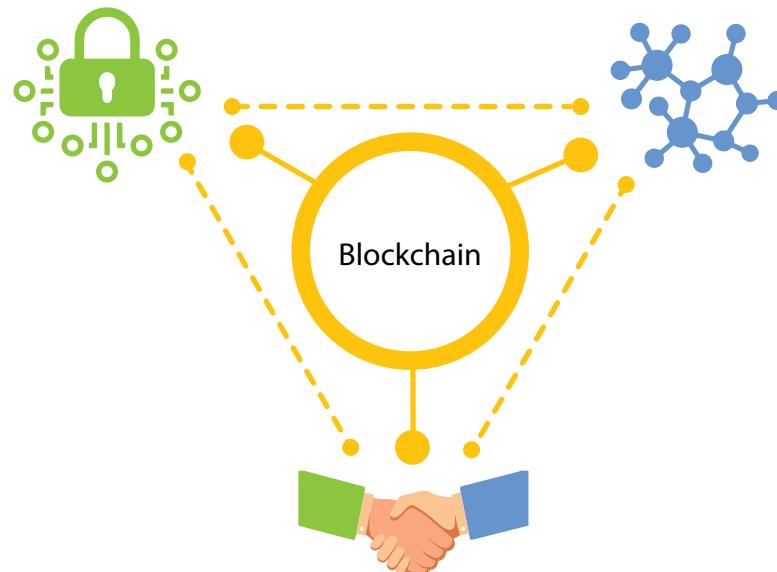

Furthermore, blockchain allows the implementation of smart contracts in managing the issuance of virtual currencies and the benefits associated with virtual currencies. This ensures that virtual coin holders can track, verify and keep the virtual coin issuer's account.

## What makes blockchain secure?

Blockchain is often touted as an efficient way of storing data. Blockchain is designed to be tamper-proof and democratic. It makes this more or less clear, through the three defining characteristics shown in the figure below.

Cryptography is a method of encoding and decoding information through complex mathematics.

The decentralized nature of blockchain technology means that it does not rely on a central point of control.

The consensus mechanism defines the verification and validation of transactions on the blockchain on a node-by-node basis.

**Cryptography (cryptography):** Cryptography is a method of encoding and decoding information through complex mathematics.

**Decentralization (Decentralization):** The decentralized nature of blockchain technology means that it does not rely on a central point of control

**Consensus (Consensus/Consensus):** The consensus mechanism defines the verification and validation of transactions on the blockchain on a node-by-node basis

# Disclaimer

Purchasing tokens are likely to be a high level of risk. You should carefully consider the risks described below, accompanied with all other information contained in CORGIDOGE coin finance's terms and conditions before deciding to purchase CORGI. The following risks entail circumstances in which our business activities, financial conditions, performance results and prospects may be exposed

## Risks associated with purchasing CORGI

---

CORGI may not be able to successfully develop, market, and launch the CORGIDOGE coin finance platform

Although a limited public closed beta of the platform has been released for testing, the CORGIDOGE coin finance technology platform has not yet been fully developed by the Company and it will require additional funding, as well as expertise, developer and manager, time and effort to successfully develop and launch the CORGIDOGE coin finance platform.

The Company may have to make changes to the specifications of the CORGIDOGE coin finance technology platform or the CORGI token for any good reason or the Company may not be able to develop the CORGIDOGE coin finance technology platform by realizing those specs or any form of working platform. It's possible that the CORGIDOGE coin finance platform has never been released, and there may never be a working CORGI Token. Furthermore, despite good faith efforts to develop and launch the CORGIDOGE coin finance platform and subsequently develop and maintain the CORGIDOGE coin finance technology platform, it is possible that the CORGIDOGE coin finance platform is malfunctioning or not being developed or maintained. In accordance with proper maintenance, this can negatively impact the CORGIDOGE coin finance and CORGI tokens.

Startups often encounter undesirable problems in the areas of product development, marketing, finance, and general management, among others that are often not solvable. Similarly, casinos may not accept the CORGIDOGE coin finance platform for any reason.

If the Company is unsuccessful in its attempt to demonstrate to users the utility and value of the CORGIDOGE coin finance platform, there will likely be very little demand for the platform and therefore of little use for CORGI. Hence, the price of CORGI could fall, possibly to zero.

## CORGIDOGE coin finance may be forced to shut down or take actions that resulted in the Dissolution Event

---

It is possible that for any reason, including but not limited to the adverse fluctuation in the value of cryptocurrencies and fiat currencies, the Company was unable to establish the launch of the CORGIDOGE coin finance platform and its utility. CORGI tokens, failure of commercial relationships, legal action or challenges of intellectual property rights, the Company may no longer function and dissolve events.

### Risks related to the CORGI token and the technology platform CORGIDOGE coin finance

---

The CORGIDOGE coin finance technology platform may not be widely applicable and have a limited number of users

It is possible that the CORGIDOGE coin finance platform will not be used by a large number of individuals, companies and other organizations or limited public interest in creating and developing online gaming platforms based on blockchain. Such lack of use or disinterest could negatively impact the development of the CORGIDOGE coin finance platform and, therefore, the potential utility of the CORGI token.
